

MEDIA RELEASE

Mindray and Inpeco Announce Strategic Cooperation

On June 13th, 2024, Shenzhen Mindray Bio-Medical Electronics Co., Ltd. (referred to as “Mindray”) and Inpeco SA. (referred to as “Inpeco”) have officially signed a strategic cooperation agreement at Mindray's headquarters in Shenzhen, China, marking a new era of innovation and collaboration in the in vitro diagnostics industry. This collaboration is founded on the companies’ mutual excellence in their respective fields, as well as their shared values and vision for the future.

Key representatives from both companies attended the signing ceremony.

Mindray, a global leader in medical devices, is committed to enhancing healthcare services through cutting-edge innovation. Inpeco, known for its pioneering and avant-garde laboratory automation solutions, has made a significant global impact with its advanced technology and superior product quality. This strategic cooperation unites the strengths of both companies to drive further advancements in healthcare.

Huawen Yan - General Manager, IVD, Mindray, stated, " Mindray is the industry leader in in vitro diagnostics (IVD) in China, providing the most complete solution for clinical laboratories. Inpeco is the global leader in Total Laboratory Automation. It is believed that the cooperation between Mindray and Inpeco will provide better IVD products, services and value to customers around the world".

Gian Andrea Emilio Pedrazzini - Honorary President and Founder, Inpeco Group:
"Inpeco is committed to the standardization of big medical data processing and laboratory automation to advance healthcare and provide more value to customers. We look forward to establishing a long-term cooperation with Mindray in the field of in vitro diagnostics, jointly joining forces to provide products and services to global customers, benefiting both companies."

Starting from this collaboration, Mindray's hematology solution will be connected to Inpeco's Total Laboratory Automation (TLA) systems. In the future, the integration of data management with other IVD products in the fields of biochemistry and immunology will continue to surpass global customer expectations for automation. By sharing resources and collaborating on technology, the overall quality of products and services will be elevated, creating greater value for customers worldwide.
